SR 169 Corridor Study

169 Above: SR 169 Corridor Study Area
(Renton to Enumclaw)

Overview

State Route 169 (SR 169) serves urban, rural, and farming areas from Enumclaw to Renton. The area's population has grown considerably in recent years and SR 169 is now experiencing the growing pains of increasing traffic congestion and accidents.

Why is WSDOT looking at ways to improve SR 169?

SR 169 is an important rural and commuter highway; a regional highway for southeast King County; a "main street" for Maple Valley, Black Diamond, and Enumclaw; and a freight connector that has mounting traffic congestion and a number of high accident locations.

Americans with Disabilities Act (ADA) Information: Individuals requiring reasonable accommodations may request written materials in alternate formats, sign language interpreters, physical accessibility accommodations, or other reasonable accommodation by contacting the Renee Zimmerman, WSDOT, Urban Planning office (206) 464-1273 usually two weeks before a meeting. Persons who are deaf or hard of hearing may call the Washington State Telecommunications Relay Service, or Tele-Braille at 7-1-1, Voice 1-800-833-6384, and ask to be connected to Renee Zimmerman, WSDOT, Urban Planning office.

Title VI Statement to Public: It is the Washington State Department of Transportation's (WSDOT) policy to assure that no person shall, on the grounds of race, color, national origin and sex, as provided by Title VI of the Civil Rights Act of 1964, be excluded from participation in, be denied the benefits of, or be otherwise discriminated against under any of its federally funded programs and activities. Any person who believes his/her Title VI protection has been violated, may file a complaint with WSDOT's Office of Equal Opportunity (OEO). For Title VI complaint forms and advice, please contact OEO's Title VI Coordinator at (360) 705-7098.

In the last eight years, traffic volumes increased 66 percent in the Renton area, 31 percent in the Maple Valley area and nine percent in Enumclaw (*Source: WSDOT Traffic Counts*). Traffic accidents are also on the rise on SR 169 as more people move to South King County.

The 2004 Legislature provided \$400,000 for WSDOT to evaluate transportation problems, identify potential improvements, and recommend projects for implementation to respond to these problems.

King County, Maple Valley and Renton have also agreed to provide \$50,000 each to bring the total project budget to \$550,000.

The End Result

The final product will be a Route Development Plan (RDP), containing community and environmentally sensitive transportation improvement recommendations that will increase safety and travel reliability; reduce person and vehicle delay; manage access; and respond to growth in the years to come.

The RDP and the list of recommended projects will be developed by the Corridor Working Group (CWG). The CWG is made up of local city, county, regional, and state partner agencies responsible for guiding the Route Development Plan effort. The CWG partners are: Black Diamond, Enumclaw, King County, Maple Valley, Renton, the Puget Sound Regional Council, and the Washington State Department of Transportation (WSDOT). The partners are also the agencies responsible for funding and implementing the RDP recommended solutions. The CWG encourages input from partners and citizens to develop consensus-based recommendations that address transportation problems along the corridor.

Key Issues So Far

- Congestion in the northern portion of the highway
- Pedestrian and vehicle safety
- Numerous driveways and other access points
- Frequent truck traffic

For more information, visit

[www.wsdot.wa.gov/
projects/sr169study/](http://www.wsdot.wa.gov/projects/sr169study/)

The RDP recommendations will include:

- Immediate-term project opportunities that can be funded and/or implemented in the first six to 18 months.
- Short-term recommendations for improved mobility and safety that can be completed in the next six years.
- Long-term recommendations (out to 20 to 25 years) for mobility and safety improvements.

Many of these projects will need detailed design and evaluations for environmental impacts before being implemented. Some projects will move forward as WSDOT projects; others will be implemented collaboratively with partner agencies; or will be done by local agencies.

What are Route Development Plans?

Route Development Plans (RDPs) are planning studies for state highway corridors. Within the study area, existing and future transportation related problems are identified and appropriate solutions proposed. Corridor lengths may vary from a few miles to an entire highway route and proposed solutions may include several alternatives. The study's analysis focuses on issues that might affect the individual state highway and surrounding communities. Those issues include: operating conditions (traffic flow), safety concerns, environmental issues, population and land development, and right-of-way. The RDP will also evaluate proposed future transportation solutions.

Project Benefits

- *Funding.* The recommended set of improvement projects will be produced in a Route Development Plan that is then incorporated into the Regional Transportation Plan and the Washington Transportation Plan (WTP) for prioritization and funding.
- *Safety.* Possible recommended safety improvements include separation of pedestrian and vehicle traffic, installation of signals and designated highway crossings.
- *Congestion Reduction.* Recommended projects will seek to reduce traffic bottlenecks and chokepoints where possible, improving the flow of people and goods through the corridor.

What is the project timeline?

We expect the study to take 18 months and conclude with the publication of the final Route Development Plan. WSDOT and the study partners are attempting to finish certain parts of the study sooner so we can submit the projects to the Legislature for funding consideration.

- September 2004 – December 2004.
Develop immediate-term list of alternatives.
- September 2004 – March 2005.
Develop short-term and long-term alternatives. Hold open houses.
- March 2005 – August 2005.
Evaluate and refine alternatives.
- September 2004 – September 2005.
Hold open houses. Draft Route Development Plan
- Late 2005.
Complete recommendations and produce RDP.

How can I get involved in this project?

Your thoughts and opinions are important to us, please contact us. Public outreach activities have already begun and will include open houses, community group presentations, project updates and e-mail updates. It is not too late to provide your comments. We will also continually update the project Web site throughout the project. www.wsdot.wa.gov/projects/sr169study/

Environmental Proection

WSDOT and its study partners make every effort to assess and avoid or minimize environmental effects from our projects. The Route Development Plan identifies environmental concerns that must be studied in greater detail when a recommended project develops the necessary Environmental Impact Statement. Please visit the WSDOT Environmental Services Web Site for more information. www.wsdot.wa.gov/environment/

Increasing safety is one of our priorities. When we submit projects for recommendation, each project will be initially screened for pedestrian and driver safety. Additionally, projects directed at reducing and eliminating traffic chokepoints also improve safety.

Will this project impact tribal resources?

At WSDOT we seek to address the concerns of the tribal nations using the process outlined in Section 106 of The National Historic Preservation Act and the WSDOT Tribal Consultation Policy adopted in 2003 by the Transportation Commission as part of the WSDOT Centennial Accord Plan www.wsdot.wa.gov/tribal/Centennial_Accord.htm. For more information, visit the WSDOT Tribal Liaison Web site www.wsdot.wa.gov/tribal.

State Route 169 is a secondary access route leading to the Muckleshoot Tribal Reservation. We have initiated government-to-government consultation between WSDOT and the Muckleshoot Tribe. Our coordination with the Tribe will continue throughout the project.
